## Insulated Glassfibre Steps

## Insulated Glassfibre Steps with Aluminium Treads

This heavy-duty non-conductive stepladder for industrial and trade use is perfect for the electrical engineering trade. Features include channel stiles and heavy-duty back bars. In addition, the extruded serrated aluminum treads are double riveted to the front legs. Avoid unnecessary risks by using this totally insulated glass fibre step.

Duty rating max. static load -150 kg .
Complies with the European EN 131 and British BS 2037 Standards.
